### SPEEDDOWN INSTALLATION WITH CP 520 AND VOICE COMMUNICATION

| Quantity | Reference | Description   |
|----------|-----------|---|
| 2        | HL 2-35   | Photocell with transmitter and receiver separated (E+R) cable and transport case (distance 80m) |
| 4        | HL 5R     | Tripod for photocell with ball-joint ¼ (Height 47cm -> 80cm)                                    |
| 1        | HL 551    | Professional Telephone set (2 x Headsets. 2 adapters)   |
| 1        | CP 520    | Chronopinter 520 (for back-up and manual timing)  |
| 10       | HL 705-3  | Paper rolls for CP 520  |

Basic installation allowing for the timekeeping and for the printing of official results a speeddown race.

Thanks to the Chronopinter 520, the timekeeping is very easy.

Possibility to print the ranking of a run or two added runs on the timing sleeve of the Chronopinter 520.

If necessary the download of the CP520 memory in the PC allows for the printing of official results, thanks to our Msports software.

If you have the possibility, you can also work in ON-LINE mode (CP520 connected to the PC during the race). The timing management is then carried out directly on the PC, making this configuration even more flexible and professional.

The voice communication is carried out on the same line as the timekeeping, thanks to our professional telephone set HL551. This product allows for a perfect communication quality and isolation which will help the timekeeper to be concentrated on his job. However this article is optional as the voice communication can also be carried out thanks to standard radio systems.

Simplicity and flexibility are the strong points of this configuration.
