PROFESSIONAL TIMING

ATHLETIC TRAINING INSTALLATION WITH 3 INTERMEDIATES

Quantity	Reference	Description
1	CP 520	Chronoprinter 520 (with transport case)
10	HL 705-3	Paper rolls for CP 520
1	HL 9-3	Starting pistol with blocked ammunition 50 pces (9 mm)
1	HL 556	Microphone transducer
9	HL 5	Tripod for photocell with ball-joint ¼ for HL 556, HL 2-31 and HL 2-34
3	HL 2-31	Photocell with reflector, cable 5m and transport case (dist. 20m)
1	HL 2-34	Double photocell "athletics" with reflectors, cable and case (distance 12m)

Installation allowing for the timing of athletic runs (sprint)

Our start pistol with blocked barrel (ref. HL9-3) with our noise detector (ref. HL556) transmits the start impulse to the Chronoprinter 520.

The photocells (ref. HL2-31) placed along the track will take all intermediate times. It is possible to place as many photocells as you wish (i.e. every 10 meters.)

Thanks to the Chronoprinter 520 and its " Split/Lap " mode, you will obtain all cumulated times and all net times between each section. This will enable you to make a very fine analysis of the athlete's performance.

Thanks to our " Athletics " photocell (ref. HL2-34), the finish signal is produced by the passage of the athlete's chest rather than by the effect of an arm.

Simplicity and flexibility are the main advantages of this configuration
