PROFESSIONAL TIMING

WIRELESS TIMING INSTALLATION FOR RALLY WITH BACK-UP SYSTEM AND OPTIONS

Quantity	Reference	Description
1	HL 650	Splitmaster 650 complete set (TX – RX – charger – antennas)
2	HL 200	Printer for HL 650
2	HL 605-10	Cable Printer -> HL 650
40	HL 705-3	Paper rolls for Printer HL 200 and Chronoprinter 520
3	HL 605-10	Cable HL 650 -> PC / HL 920 -> Printer and HL 650 -> Printer
1	HL 650-V	Professional Telephone set (2 x Headsets. 2 adapters)
2	HL 2-35	Photocell with transmitter and receiver separated (E+R) cable and transport case (distance 80m)
4	HL 5R	Tripod for photocell with ball-joint ¼ (Height 47cm -> 80cm)
1	HL 920	Professional start clock with charger and transport case
1	HL 5R	Special Tripod « Rally » (Height 81cm -> 93 cm)
1	HL 605-2	Printer for HL 920
1	HL 605-10	Cable Printer -> Start Clock
10	HL 501-3	Paper rolls for Printer HL 605-2
1	HL 553	Impulse distributor with optocoupler
* 1	HL 960	6-digit display
1	HL 960-12	External power supply for HL 960
1	HL 960-8	External power supply cable
1	HL 960-14	Cable PC -> Display (10m)
1	MSPORTS	Multi-sport Software
2	CP 520	Chronopinter 520 (Back-up)
2	HL 18	Manual contactor (for manual Timing)
1	HL 520-10	9 pin computer cable for PC connection with CP520

- * The HL 960 can be replaced by our HL 965 / 6-digit display / 25 cm (dim. 160x35x15 cm) or HL 990 / 9-digit display 15 cm (dim. 150x23x12cm)
 Optionally, you can add Internal accumulator in our HL 960 / 965 or 965 (in this case, you don't need to order external power supply (HL 960-12) and connection cable (HL 960-8))

PROFESSIONAL TIMING

Installation allowing for the wireless timing of a rally special stage.

For the organizers who wish to get the net time of the competitor right after the crossing of the finish line.

The installation of timing wires over long distances has always been a hassle for any organization of a rally special stage.

Thanks to the SPLITMASTER 650, you time a race without cables. The power of its transmission (2,5 W or 5 W) allows for the reception of timing impulses and voice communication over long distances in total security. Due to its power, the SPLITMASTER 650 is subject to the hire of a telecom licence that you can obtain from your competent local authorities.

The SPLITMASTER 650 is the unique wireless timing device of the market allowing for the voice communication between start and finish.

The Receiver transmits the timing data directly to the PC which will then calculate the net times and print the official results of the special stage.

The start photocell linked to our start clock ref. HL920 and printer allows for the printing of the ideal start times, real start times and the difference between them. You will then be able to sanction easily and accurately the anticipated starts.

In order to increase the security of the system, back-up devices (CP520) can be connected directly to the photocells.

Mobility, total security and wireless voice communication are the main advantages of this configuration.
