WIRELESS SKI TIMING INSTALLATION WITH START CLOCK AND BACK-UP SYSTEM (FIS RULES)

PROFESSIONAL TIMING

WIRELESS SKI TIMING INSTALLATION WITH START CLOCK AND BACK-UP SYSTEM (FIS RULES)

Quantity	Reference	Description
1	HL 920	Professional start clock with charger and transport case
1	HL 6	Professional tripod for Start clock
1	HL 7-1	Start gate FIS with double contacts and double outputs
1	HL 7-114	Additional wand for HL 7-1
1	HL 650	Splitmaster 650 complete set (TX – RX – charger – antennas)
2	HL 200	Printer for HL 650
40	HL 705-3	Paper rolls for Printer and for Chronoprinter 520
3	HL 605-10	Cable HL 650 -> PC / Printer HL 200 -> HL 650
1	HL 650-V	Professional Telephone set (2 x Headsets. 2 adapters)
1	HL 2-32	Professional Photocell (FIS) with 2 transmitter + 2 receiver separated,(set)
2	HL 4-3	2 supports for photocells HL 2-32
2	CP 520	Chronoprinter 520 (Back-up)
1	HL 520-10	9 pin computer cable for PC connection with CP520
* 1	HL 960	6-digit display
1	HL 960-12	External power supply for HL 960
1	HL 960-8	External power supply cable
1	HL 960-14	Cable PC-> Display (10m)
1	SKI	Professional Software (FIS/SWISS SKI/FFS/DSV/ÖSV)

- * The HL 960 can be replaced by our HL 965 / 6-digit display / 25 cm (dim. 160x35x15 cm) or HL 990 / 9-digit display 15 cm (dim. 150x23x12cm)
Optionally, you can add Internal accumulator in our HL 960 / 965 or 965 (in this case, you don't need to order external power supply (HL 960-12) and connection cable (HL 960-8)

PROFESSIONAL TIMING

Installation allowing for the wireless timing of an international ski race (FIS) and for the printing of official results.

As from the 2002/2003 season, the FIS (International Ski Federation) authorise the use of wireless timing systems to the condition that an electronic back-up (system B) is available at the start and at the finish.

The SPLITMASTER 650 is FIS homologated (no. TAG.001.02)

Thanks to the SPLITMASTER 650, you time a race without cables. The power of its transmission (2,5 W or 5 W) allows for the reception of timing impulses and voice communication over long distances in total security. Due to its power, the SPLITMASTER 650 is subject to the hire of a telecom licence that you can obtain from your competent local authorities.

The SPLITMASTER 650 is the unique wireless timing device of the market allowing for the voice communication between start and finish.

The Receiver transmits the timing data directly to the PC. Our SKI software allows for the complete management of any international or national race with points (FIS, Swiss-Ski, ÖSV, DSV, etc..). Automatic entries of competitors thanks to the federation data bases, timing, official results, penalty calculation, return of the results in the specified format, etc..

Mobility, reliability of transmission and wireless voice communication are the main advantages of this configuration.
