Optionally, you can add Internal accumulator in our HL 960 / 965 or 965 (in this case, you don't need to order external power supply (HL 960-12) and connection cable (HL 960-8)

Professional installation allowing for the timekeeping of a INLINE downhill race and for the printing of official results.

The principle of linking a professional time base to a PC offers a professional kit at a very competitive price. Thanks to our PTB605 which transmits ON LINE the information to the PC and to our MSPORTS software, you manage easily all the timing operations directly on the PC. Thanks to its bidirectional feature (unique on the market), the PTB605 prints the calculated times, the names of competitors, the rankings, the DNFs, the DSQs, etc...

Our MSPORTS software allows for the complete management of any race. Entry of competitors, timing, official results, etc..

The voice communication is carried out on the same line as the timekeeping, thanks to our professional telephone set HL551. This product allows for a perfect communication quality and isolation which will help the timekeeper to be concentrated on his job.

Thanks to our optocoupler HL553, your timing wires will be isolated et protected from any electronic interference. An additional security that we advise you to take.
