PROFESSIONAL TIMING

WIRELESS TIMING JUMPING INSTALLATION WITH INTERMEDIATE, PTB 605 AND WITHOUT DISPLAYS

Quantity	Reference	Description
3	HL 2-31	Photocell with reflector, cable 5m and transport case (dist. 20m)
6	HL 5	Tripod for photocell HL 2-31
1	PTB 605	Precision Time Base 605 WITH printer and transport case
1	HL 605-1	External power supply
1	HL 18-J	Manual contactor for the jury (start - stop - restart)
10	HL 501-3	Paper roll for Printer
1	HL 610	Impulse transmission system via radio (complete set)
2	HL 610-1	Additional transmitter for HL 610
1	JUMPING	Jumping Professional Software
1	SMS 200	Microsplit for manual timing (with split on time-of-day)

Installation allowing for the timing and for the printing of official results of horse jumping events.

The principle of linking a professional time base to a PC offers a professional kit at a very competitive price. Thanks to our PTB605 which transmits ON LINE the information to the PC and to our JUMPING software (which thoroughly respects the FEI rules), you manage easily all the timing operations directly on the PC. Thanks to its bidirectional feature (unique on the market), the PTB605 prints the calculated times, the names of riders and horses, the rankings, the penalties, etc...A few seconds after the end of the competition, you will then be able to print the official results.

Our photocells directly connected to our radio system (ref. HL610) allows for the wireless transmission of timing impulses in total security and above all with a maximum precision of 1/10'000th of a second !

Mobility, flexibility and professionalism are the strong points of this configuration.

Important remark :

All TAG Heuer devices and accessories respect the most severe norms in matter of accuracy. It is not the case of many cheap installations that one can find on the market. Horse jumping is a discipline sanctioned at the 1/100th of a second. To guarantee a net time at 1/100th of a sec, an accurate measure of the 1/1'000th of a second is necessary.

This noble sport deserves the use of accurate devices. In working with TAG Heuer, you will be certain to sanction correctly the performances of riders and horses and consequently to respect the equity of sport.
